

## OPERATION TRIDENT

**Mission: 17 JANUARY 2025, JTF 141 conducts amphibious landings to attack to destroy enemy capabilities IVO Bow Airfield in order to deny enemy ability to disrupt international sea-lanes.**

**Situation:** The overthrow of the world recognized Republic of Hibernia (RoH) government by extremist factions has led to growing concerns that the medium range bombers capable of air launched hypersonic cruise missiles will be based at the defunct Bow Airfield (BAF) (the only RoH AFB with long enough runways to support medium range bombers.) OGA provided INTSUM indicate that medium bombers will be flown in from an unaligned extremist country in the next 24 hours. Combined with the remaining stockpile of ALHCM it will destabilize the region's use of the waterways

**Enemy:** Russar Ground Forces (RUSFOR) are using the Auxiliary Airfield at Ray Point to fly in heavy construction equipment, navigational tech, & personnel to complete the refurbishment of BAF. RUSFOR has hired former Regime Military Personnel to provide security at BAF as well as emplaced a layered modern Air Defense System to prevent Coalition Air Strikes. RUSFOR maintains a mounted & dismounted QRFs 15mins away at Dosville Aux Airfield.

**Terrain:** **Bow Airbase (BAF)** Main airstrip, with a secondary STOL airstrip, 3x taxi curtains  
**GOLD BEACH** 100 meters long, Sand, flat, gentle rise up to grassline, then airstrip. Calm water state  
**GREEN BEACH** 100meters long, Sand, flat, gentle rise up to grassline, then airstrip. Scattered trees for cover/concealment. Calm water state  
 Cratering Charges at the 2 designated locations will render BAF useless for medium aircraft ALHCM capable

**CDR's INTENT: For DOG & FOX Platoons conduct amphib assaults from 2 beaches, eliminating enemy airfield defense, crater critical runway locations, and defeat enemy counterattacks, then withdraw by boat.**

### 4 Phase Operation

- 1) Plan, prep, Rxl
- 2) Movement by boat support to assault beaches, conduct assault landings
- 3) Destroy enemy at BAF, crater runways at 2 locations, prepare for enemy QRFs
- 4) defeat enemy QRFs, re-embark boats for transport

### Key Tasks

- 1) Conduct required rehearsals (embark/disembark boats), (actions on the OBJs) (retrograde)
- 2) Utilize violence of action to swiftly eliminate militia and place cratering charges at OBJ COIN (FOX PLT) and DOLLAR (DOG PLT)
- 3) Both platoons execute ambushes to defeat/delay enemy QRFs (FOX platoon in North, DOG PLT in south)
- 4) Platoons re-embark boats in organized retrograde from assigned beaches

**Endstate:** Enemy eliminated on all OBJs, airfield rendered useless to enemy, all friendly forces withdrawn from combat area.
